

SolarTwin AI

Enterprise Solar Assessment Report

09-07-2026 22:35

Project Information

Parameter	Value
Location	Airoli, Airoli Station Road, Airoli Sector 2, Airoli, Navi Mumbai, Thane
Roof Area	2.81 m²
Panels	0
Capacity	0.00 kW
Orientation	Portrait

Weather

Parameter	Value
Temperature	27.0 °C
Cloud Cover	76 %
Wind	11.0 km/h
Humidity	90 %

Solar Production

Parameter	Value
Annual Energy	0 kWh
Daily Energy	0.0 kWh
Annual Saving	■ 0
Payback	0 Years
25 Year Profit	■ 0

AI Recommendations

- South facing installation recommended.
- Remove rooftop obstacles if possible.
- Periodic cleaning improves generation.

Executive Conclusion

SolarTwin AI concludes that the analysed rooftop is suitable for a photovoltaic installation of approximately 0.00 kW. The estimated annual production is 0 kWh, with estimated annual savings of ■ 0. The generated layout maximizes the usable roof area while considering rooftop geometry and detected obstacles. The proposed design is recommended for further engineering validation before installation.
